Your Support Creates a Future – Discover Our Annual Report

Dear friends of The Hunger Project Switzerland

Previously, the life of **Nathalie Guédé from Benin** was shaped by worrying about the next meal. Today, she **proudly looks back on a harvest three times larger than before**. Thanks to modern farming methods and digital weather forecasts, her children finally have enough to eat and regularly attend school!

This transformation toward greater self-determination shows what we can achieve together. Our **Annual Report 2025** demonstrates how your support creates hope and enables sustainable change. **It tells the stories of people, opportunities, and concrete impact** – transparently, comprehensively, and responsibly.

We warmly invite you to browse through it and learn more at: www.hungerprojekt.ch > Who we are > Annual reports

- **Personal stories:** Meet people like Nathalie and learn how local solutions create new opportunities.
- **Insights into our program countries:** Discover our projects in Benin and Burkina Faso, from shea butter production to the cultivation of climate-resilient sweet potatoes.
- **Outlook for 2026:** Read how we plan to further develop our work and launch new initiatives in Ghana and Zambia.

Despite this progress, the challenge remains enormous: 673 million people worldwide still suffer from chronic hunger. **Please continue to be part of this important movement.** Together, we can help families overcome poverty and hunger sustainably – through their own strength and renewed confidence.

Thank you very much for your trust and support!

Alexandra Koch & Katja Fechteler
Co-Managing Directors

Your Donation Makes a Difference – direct and measurable

Last year, our global network reached a total of 12.7 million people. Already 90 Epicenters have successfully completed the journey toward self-reliance. In addition, severe and moderate hunger in these regions has been reduced by at least 20%!

We at THP Switzerland have also specifically supported local projects and achieved sustainable impact:

- **Education for the future:** In Burkina Faso and Benin, we trained almost 3,000 smallholder farmers in sustainable agriculture.
- **Multiplier effect:** More than one million people in surrounding village communities benefit indirectly from these training programs.
- **Adapting to climate change:** Through targeted campaigns and radio programs, we raised awareness among more than 2,500 people about the challenges of climate change.

To continue this path consistently in 2026, expand existing programs, and launch new ones, we still need you by our side. **Every contribution helps people in need build a better life. Thank you very much!**

This is how you change lives:

With **CHF 500**, for example, 100 people in Burkina Faso can be **trained in modern farming methods** to secure their food supply in the long term.

With **CHF 350**, for example, a woman in Benin can be trained as a **shea producer** and independently support her family thanks to her income.

With **CHF 100**, for example, you can enable one person in Benin to participate in our one-year entrepreneurship training program.
